Chapter 4

- Education of Islamic Gift Economic (IGE)

INTRODUCTION AND CHRONOLOGY OF PROJECT DEVELOPMENT

This project was planned and developed by the Al Hidayah Group (AHG). The project is based on a Memorandum of Understanding (MOU) signed between the Al Hidayah Group (AHG) and D8 Organization for Economic Cooperation on 26th May 2024. Subsequently AHG with D8 Malaysia Foundation intent to collaborates with International Islamic University Malaysia (IIUM), Islamic and Science University Malaysia (USIM) and University Malaysia Pahang Sultan Abdullah (UMPSA) to develop “CREATIVE ECONOMY AND FINANCIAL CENTER (CEFC) @ D8 CEFC EDUCATON PROJECT that would draw on education and training developments in economic and business to support the community and the development generally of an educated and knowledge-based society. The development of a business educated society which focuses on Good Islamic Business Practice is seen as critical by the AHG to successfully compete in the new global economic environment.

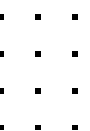

The AHG leadership shared the vision of the D8 Organization for economic Cooperation and decided to provide technical assistance in the preparation of the project document. It was envisaged that the AHG would fund an aspect of the project and would seek to interest other international development partners in funding other components. It was also envisaged that the project would be funded from contribution from the local and corporate Malaysia.

Following the signing of the MOU, the AHG in collaboration with UIAM, USIM and UPMSA proceeded immediately to prepare a draft feasibility study for a project entitled “CEFC Education Center Project” The project represents the views of both AHG and 3 University in terms of the strategy to address certain specific constraints and needs within the education sector.

On completion of the draft feasibility study, it was shared with the AHG and several other local stakeholders for comments. With funding from the AHG, through a competitive selection process, AHG reviewed and appraised the draft feasibility study and advised on the suitability of the project as planned. This required the Consultants to undertake field work comprising extensive consultation with a range of stakeholders including:

In their field work and consultation exercise, the Consultants sought to get feedback from the various stakeholder groups regarding the proposed project and the design of the various project components. The Consultants presented their findings and recommendations at a meeting of senior directors and technocrats of the AHG. The draft final report was presented to the AHG for comments.

The AHG drew on the findings and recommendations in the final report of CREATIVE ECONOMY AND FINANCIAL CENTER EDUCATON PROJECT, AHG will finalise the comments from the report and D8MF to prepare this final version of the “Feasibility Study on CEFC Education Project.” This is therefore the official document that will guide the implementation of the Project.

Education in Islamic Gift Economy (IGE)

Proposed Collaboration with IIUM, USIM and UMPSA: Empowering Tomorrow's Economy: Unveiling the Transformative Benefits of the Islamic Gift Economy in the Modern World.

Introduction

D8 CEFC program includes the introduction of Islamic Gift Economy model as an option to the conventional Capitalist model. AHG believes that education in the Islamic Gift Economy offers a holistic and ethical framework for business to thrive. The principles of community, ethics, sustainability, and innovation can guide businesses towards responsible business practices that not only contribute to their success but also foster positive societal impact. Embracing these principles through education can position businesses as contributors to a more inclusive, ethical, and sustainable economic landscape.

There are over 10.0 million businesses in Malaysia and over 120.0 million in D8 member states. D8 CEFC plans to build one community of all these businesses to benefit from the massive size and to ensure the success adoption of Islamic Gift Economy. This community of business owners is considered vital as the driving factor in making changes in any economy.

The contents/syllabus of the course will focus on the following:

- a. Marketing in the modern world (Digital marketing)
- b. Management of businesses through advance technology (IT)
- c. Islamic Gift Economy and Islamic Values

The program is centered at the establishment of a Creative Economy Education Center (CEEC), a dedicated institution aimed at providing comprehensive education and training programs for MyMasjid agents and existing entrepreneurs. The center will play a pivotal role in fostering a culture of innovation, business acumen, and economic development within our community.

Entrepreneurs play a crucial role in driving economic growth, job creation, and innovation. Their ability to identify opportunities, take calculated risks, and create value contributes significantly to a nation's Gross Domestic Product (GDP). Recognizing the importance of entrepreneurs in the economic landscape, our proposal seeks to address the need for a specialized education center focused on empowering individuals with the knowledge and skills necessary to succeed in entrepreneurial ventures.

Chapter 5

- MyMasjid SDG Program with Pemimpin Pusat Muhammadiyah at Jogjakarta @ Indonesia

Embarking on a visit to Jogjakarta, Indonesia, our aim to connect with Pimpinan Pusat Muhammadiyah, a leading Islamic NGO known for its reformist platform. Founded in 1912, Muhammadiyah focuses on blending religious and secular education to modernize Muslim communities.

With a strong presence in social and educational initiatives, as well as charity hospitals, Muhammadiyah is a key player in promoting religious tolerance. Our initiative aims to strengthen ties with the second-largest Muslim organization in Indonesia, aligning with shared objectives.

Business Visit to Jogjakarta , Indonesia 4-7 Jan 24

6th January 2024

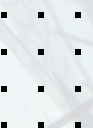

Met with Destita Mutiara and Yeyen Febrilia, in charge of Muhammadiyah's waqf team. The team has expanded significantly, engaging in waqf initiatives for hospitals, schools, and universities. They will serve as operators for SDG programs via MyMasjid Digital Apps.

7th January 2024

In Meeting with Ustaz Muhammad Jazir, Chief of Masjid Jogokariyan, to introduce our D-8 CEFC program and the mosque management system integrated into the My Masjid Digital app. Masjid Jogokariyan operates under a traditional concept, encompassing aspects like Baitullah BaitulMal , Baitul Muamalat , Baitul Tarbiah , Baitul Dakwah , and Baitul Suasar.

In conclusion, Muhammadiyah's involvement in the pilot project of the D-8 CEFC Program holds immense potential for transformative impact on society, community, and the economy. Following a positive presentation, their expressed interest indicates a promising start for the program. The agreement reached during discussions with Muhammadiyah Organization personnel reflects a favorable beginning, with the organization's extensive support for local culture, promotion of religious tolerance, and impressive infrastructure, making it a key player in advancing the objectives of the D-8 CEFC Program in Indonesia.
